A big plus

Your donation **saves lives**

The coronavirus is affecting all of us. The global coronavirus crisis has drastically changed our lives – even in Switzerland. In fact, the crisis has also shown us that compared to people in many other countries, we are well looked after here thanks to our efficient health system.

Unfortunately, many countries face a different situation. We should therefore show solidarity and **help to save lives in the long term.**

For 20 years, the UBS Optimus Foundation has been committed to helping the world's most vulnerable people and has launched a response fund to fight the pandemic. The aim is to prevent people from dying from COVID-19 and other diseases in developing and emerging countries in particular. Essentially, we have a clear strategy that focuses on **prevention, detection and emergency aid. In the long term, people worldwide should be better protected against disease** and have the chance to grow up and live healthily.

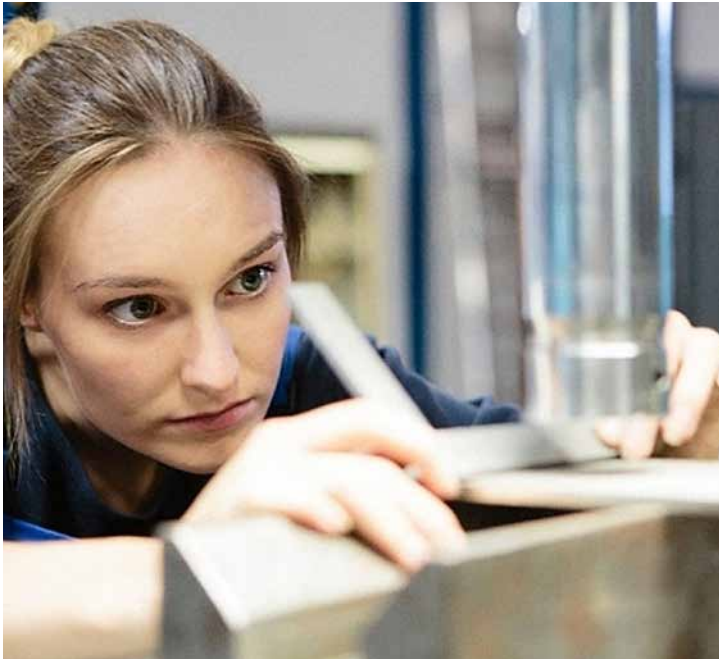

Thanks to your donation and the organizations that meet our selection criteria, you will make a significant contribution to achieving a long-term improvement in the current situation. In addition, UBS covers all of the foundation's costs, which means that 100 percent of your donation will go directly where it's needed most.

On the following pages, we present the areas that benefit from the resources of the response fund and give examples of specific programs that we are able to help. And not only abroad, because donations also go to Swiss support initiatives.

Help us now by making a donation to the UBS Optimus Foundation response fund. Because health is the most valuable thing of all. Find out more:

Send a positive signal

Give young people in Switzerland **a fair chance to start a career**

An organization that assists apprentices and young professionals with free mentoring.

The coronavirus crisis represents a challenge in Switzerland too. For example, the current extraordinary situation in this country is affecting young people starting a career. Job Caddie is dedicated to helping young adults overcome these difficult conditions, which can also be quite psychologically stressful. Every year, the organization offers free mentoring to over 500 young people who encounter difficulties during their apprenticeship or as they start a career.

Thanks to Job Caddie, young people receive mentoring to improve their career prospects.

Give pregnant women and children **a greater chance of survival**

The COVID-19 Response Fund also supports programs that use innovative tools to improve healthcare in areas lacking in resources.

It's crucial to close urgent healthcare gaps all the more quickly in emergency situations. That's why we also support projects that focus on innovative technical solutions, like providing pregnant women and nurses with digital aids to ensure that they have access to prompt, high-quality care. For example with our partner Jacaranda Health.

Or to make medical oxygen available at low cost – in countries where it is scarce. Thereby helping pregnant women in particular and reducing infant and children mortality rates. Like with the Hewatele program, for instance.

A nurse gives a mother real-time information on the health of her baby thanks to digital tools from Jacaranda Health.

Give people in remote areas **a better chance of health**

Two examples from the COVID-19 Response Fund that bring essential health services to neglected areas.

Integrate Health or Last Mile Health are committed to providing broad sections of the population with access to high-quality basic healthcare. They save lives in the most neglected areas of the world by integrating professional community health workers. These community health workers carry out educational activities or provide direct medical support to protect the population from a variety of diseases and to offer treatment.

A community health worker from Last Mile Health examines a newborn baby in Liberia.

A community health worker from Integrate Health cares for families in Togo.

Your franc + our commitment

Every franc helps. And will be **doubled***.
